So the final array should look like: \$vals = array("first", "second", "third", "sixth"); I can do this with sort(\$vals, SORT_NATURAL); but this doesn't sort by strings. I could replace the values like: \$vals = array("first", "first", "third", "sixth"); then sort(\$vals, SORT_NATURAL); but I am looking for a solution that doesn't involve replacing the values. Because an office will burn tonnes of carbon when it is produced, it's important to find a paper that minimises the amount of carbon that will go into it. What's more, if you consider the carbon emissions that will be used to transport the paper from China to where it's needed, it's even more important to find a paper that will reduce the amount of carbon that will be needed for transport.Q: How to make a branch execute multiple commands in a shell script This script is a shell script which downloads multiple packages of each type from the url: `#!/bin/bash read -p "Enter your URL: " url read -p "Enter a commit message [default is 'no-commit-message']: " commit_message read -p "Enter the branch name for the commit: " branch_name git branch $branch_name git config --global user.email "me@me.com" git config --global user.name "me" git config --global push.default matching git fetch --all --tags git checkout -b "$branch_name" $commit_message git tag $commit_message git branch -D $branch_name git checkout $commit_message git branch -m $commit_message git config --global user.name "me" git config --global user.email "me@me.com" git config --global push.default matching git remote`

I've been using AutoCAD since it was AutoCAD 2D, and I still use it today, on my iPad. I always find new ways to use it, because it's so flexible. Every time I switch from Windows to iPad and back, I'm always impressed with the AutoCAD tablet app. With AutoCAD 2023, we're giving you more ways to work—and more ways to collaborate. We're providing faster, simpler ways to create and share great designs. You can see what's new in AutoCAD 2023 from the team that made the app! Follow us on Twitter to find out about the latest features. Markup Import and Markup Assist When you make a drawing, you often want to review it in a different way. You want to capture your ideas in a quick, graphic way. But there's no simple way to capture quick sketches and send them directly back to your CAD model. If you're like me, you like to communicate through email and PDFs. And you often want to change your sketches in the process. In AutoCAD 2023, we've made it easier to import and annotate PDFs. You can import any PDF into a drawing—and then use Adobe Acrobat to apply annotations. You can also send annotated PDFs directly back to your model. And the annotations are stored in the drawing, so you can keep editing them over and over. Markup Assist With AutoCAD's Markup Assist feature, you can share the annotated PDF and annotations directly in email or even in an instant message. You can send all the changes you made to a drawing to a colleague. (I use the term "colleague" loosely, because I don't know who else I'm going to
