Effects Effects are like brushes without the paint - you can use effects to create wavy patterns, shine, and other cool special effects. Effects can be found in the Effects panel, and are available in a variety of different variations. Depending on the effect, sometimes you need to activate and deactivate a panel icon. Unlike brushes, effects have a red icon that always shows which is which. Graphic Designing Photoshop has a multitude of features for graphic design. This includes an artistic brush, graphics-oriented selection tool, a wide variety of fonts and shapes, as well as useful tool shortcuts. Main Features Many professional graphic designers prefer to work with Photoshop, because it offers so many options for painting, moving around images, and much more. Below are some of the more popular Photoshop features. Canvas You can paint in an unlimited canvas area, or limit your work to a fixed size. You can also hide or remove the canvas from your document, or even go full screen. The 'Canvas Size' is the area of the document that you can paint. It usually has a specific name (e.g. A3) and uses the Photoshop pixel, or pixel dimension. Paint Bucket The Paint Bucket is used for filling your canvas with a color, or by removing color. You can also select an area of your canvas (e.g. a part of a photograph), and paint in another area of the canvas. You can use a color picker (Icon), or search for a color from a palette of colors. Transform The Transform tool is a very useful tool for cropping or scaling an image, by moving the corners or edges around. You can also flip or rotate an image. The tool is found in the 'Edit Menu', and the icon is a square. Pinch or move the image around to resize the canvas. Press Ctrl (Windows) or Command (Mac) + zoom to see a magnified detail. Rectangle, Ellipse and Rounded Rectangle Once you have an image in place, you can easily draw a rectangle, an ellipse or even a rounded rectangle. You can delete and add new rectangles, and you can rotate, scale or skew the size of your rectangles. These icons are red-colored. You can also create freehand or perfect circles using the Shape tool. Brush There are many kinds of brushes - now it depends on which one

The group runs on a social basis, centred around the time-honoured lunchtime get together, which in recent years has met at Halls of Residence at University College London. This group is organised by the TV and Video group, which is the University's officially recognised professional society. How to apply for a place on this training group Applying to this group is very straightforward. You will be put in touch with one of our training coordinators, who will be able to answer any questions you may have.
