SYSTEM TOOLS Notes Address Book Converter is an application that provides users with the possibility to easily export their Lotus Notes contacts to formats such as Outlook PST, vCard, or Excel. Very simple looks The

application comes with an intuitive interface, which is very easy-to-use, thus making it suitable for all kinds of users, including those who do not posses advanced computer skills. With the help of this tool, users can convert their Lotus Notes address books to Outlook-compatible formats with only a few mouse clicks, which facilitates the transition to a new platform without loss of information. Batch conversion capabilities The software has been designed with batch conversion functionality, which means that users can select multiple Lotus Notes contacts and have them converted without further interaction with the tool. In fact, users only need to browse for the NSF file they want to extract contacts from and to hit the conversion button. The software can scan the selected file for contacts, and automatically displays all of them on its main window in an alphabetical order. Thus, users can easily preview all of the details associated with their contacts, including address, business and personal information, and the like. Export contacts in three formats The software provides users with the possibility to export their contacts in three different formats, for increased convenience. Thus, they can save Notes contacts to Outlook address book, to Excel spreadsheets, or to vCard files. With the help of

this tool, users can create a PST file with all of the contacts included in the original address book, but they can also opt in to have them saved as Outlook 2000/2002/XP format or MS Outlook 2003 and later format. Fast, reliable operations During our testing, we noticed that the program can scan the selected file fast, being able to display the contacts included in it almost instantly. It is also snappy when it comes to converting files, and does not require a large amount of system resources for that. All in all, SysTools Notes Address Book Converter can easily prove a good option for users interested in migrating their Lotus Notes contacts to Outlook or other formats, as it is easy-to-use and snappy, and also offers a preview of contact details before conversion. Lotus Notes is a type of groupware application which can be used as a personal information manager by both individuals and businesses. It can be used as an email client to send and receive emails, and as a calendaring tool to schedule appointments and tasks. It is used by both home and office users, and can be used as an alternative to Microsoft Outlook. Features: Lotus Notes has been designed to be intuitive. It can be used with ease by anyone, irrespective of their level of computer experience. The interface is friendly and non-

threatening, thus creating a great impression in the user's mind, making them enjoy using the software. Lotus Notes also has
