Since its initial release, AutoCAD has been extended with various application-specific functions for use in various industrial and engineering applications. Some functions were added to satisfy specific industry standards or standards-based requirements; for example, the 2011 release of AutoCAD added a standardized feature to accept new blocks and symbols created by industry standards such as the ISO 12204 standard. Although AutoCAD is primarily a CAD software application, since it was released in 1982, it has become a significant application in the architecture, engineering, and construction (AEC) industries, as well as in hobbyist communities. AutoCAD has a worldwide installed base of over two million users. Applications Most AutoCAD users work with the standard application. Other specialized versions of AutoCAD may be available for custom uses. AutoCAD LT is a free, limited use version of AutoCAD. It requires a full version of AutoCAD and is designed for schools, businesses with no complex production and maintenance systems, and contractors with no production time for their drawings. The program is similar to Microsoft Excel for storing and analyzing data. AutoCAD Web Edition is a web-based version of AutoCAD that allows users to run the program from a web browser. The program was previously available in beta, then released in 2010 as AutoCAD Web Edition 2010. It is designed for situations in which the software needs to be accessed from a web browser, as opposed to a standard computer running Windows or a Mac OS. AutoCAD Cloud is an online version of AutoCAD, which allows users to store their data online and automatically transfer files to any computer with the program installed. The data is stored in the cloud and users can access it using a web browser and a standard computer. Mobile CAD is a mobile version of AutoCAD that is designed to run on mobile devices such as Apple iOS and Google Android smartphones and tablets. The program is designed to create and edit drawings in real time on mobile devices. This feature was introduced in AutoCAD 2011. AutoCAD for Android is a mobile version of AutoCAD that can run on Android-powered smartphones and tablets. The program's interface is similar to that of AutoCAD LT, but the interface is not as easy to use as the desktop version. The program has a license fee, but it is free for users who have AutoCAD LT.
