It may not be ideal for those who want to customise the licensing scheme of the Autocad software. It is available to students with a subscription. This does not mean you are forced to be a student at that time, but at least you have the opportunity. You cannot carry a licence from one computer to another, so if you have a business you have to be careful. What is different with the new Autodesk licensing scheme? Autodesk made it so you could use software from Autodesk on all your devices. Free updates are provided The licence key is tied to an email. This means if you ever change email, you need to contact Autodesk again and have it re-registered. Cons It is just like any other autocad software, which means it is not that much easier to use. The licensing scheme is new and so there are no advantages to it. It does not take advantage of things other people have already created. Is the new Autodesk licensing scheme really free?
