What's New in the MusicCut?

The Palm OS music player is an award-winning, cross platform music player. It can play virtually any type of music - mp3, ogg, wma, itc, aif, aiff, asf, flac, wav, wma, itc, snd, au, mid, midi. The Palm OS music player is fully multithreaded and supports seamless playback, track selection, Jump to track, and the ability to play music from an FTP site, playlists and the user's music collection. The VB Music Player is an award-winning, cross platform music player. It plays virtually any type of music - mp3, wma, wav, ogg, itc, aif, aiff, asf, flac, wma, itc, snd, au, mid, midi. Its interface is visual basic (VB) based. The design and features of the software have been handcrafted by an ex-Microsoft Visual Basic programmer and music fanatic to make the player as flexible as possible. Features include visual themes, themes and skins, the ability to play music from an FTP site, playlists and the user's music collection, as well as transport functions and other features to make the player as flexible as possible. The VB music player also has its own 'song list' and an undo function with a history of previous steps. The music player has been extensively beta tested on Palm, Pocket PC and other handhelds since March 1999. The MP3 File Wizard allows you to search your entire hard disk for MP3 music and converts your music to MP3 format. It extracts music from the CDs you rip from your favorite music CD's and automatically tags the music. Once the music is saved as an MP3, the MP3 File Wizard automatically adds metadata such as the artist, album, length, genre, picture, and more! MusicLoop is a powerful song listening and looping software. No matter you are using a phone, PDA, or a laptop, all of them are able to listen to your favorite music via MusicLoop. It can play over 30 types of music files such as MP3, WMA, OGG, AAC, AAC+, FLAC, MOD, MID, IMY etc. But the most important feature that makes MusicLoop different from other MP3 programs is that it includes an Automatic Song Identification and Smart Music Importing. Its automatic song identification system can identify the music you
