The remuneration committee of Britain's largest listed engineering firm, Babcock, is due to meet later on Monday. But we may not hear much more than whether it will slap a 10% dividend increase on the company's shares. After all, it is the same 10% dividend that has been paid for the past year. Analysts have been forecasting that dividends would rise and be paid out after profit figures came in above expectations at the end of last year. It is also a firm which is currently in talks with US power company Nuclear Development and Engineering (NuAge) about the sale of the company's civil nuclear business, Nuclear Power Partners. NuAge has offered to buy the business for £1.5bn, cash and debt. The sellers, Babcock and Rolls-Royce, have said they would hold talks with NuAge, but that the deal was not done yet. But the market has been enjoying the prospect of a big increase in dividends to Babcock's shareholders - the dividend has been issued on a semi-annual basis. In this year's dividend, the share-owners will have been rewarded for any improvement in profits made by the engineering giant over the past year. Analysts had forecast that profits would come in at around £1.8bn for the year to March, slightly higher than last year's figures of £1.6bn. That would be seen as a welcome increase over the last year, which saw profits fall to £1.4bn. Over that time, the share price of the company has risen by more than a third, to £13.35. ## **What's new in Don't Starve Together: Spring Cleaning Bundle:**

**is a great read - it is a thorough compilation of the 500+ pieces of art made by Kickstarter backers over the course of the project. When I stumbled upon it, I was intrigued by the particular range of art drawn during the planning stages of the project, specifically, the "just some quick sketches of what we might end up with" stage. Not only did this experiment give us a sense of the final art that backers would see in the final game, it offered a preview of the silliness and desire to do a ridiculous amount of art and meet a ridiculous amount of stretch goals that inspired so many backers. I was lucky enough to attend a few of their sessions, and these are some of my images from the sessions. I have left each image around as well as the archival name (a tag (or sticker) indicating its class) and a few observations from my notes: The Vagrant Artbook is a great read - it is a thorough compilation of the 500+ pieces of art made by Kickstarter backers over the course of the project.
