Team ratings show each player's skills at dealing with the ball based on your decisions to control the ball and your opponent's decisions to 'bully' or obstruct your attempts at controlling the ball. The more control the ball is in your hands, the higher the rating. You will win more battles and contribute more to the final result. The ratings, which take into account the positions of the players on the pitch, are applied to the 'in-game intelligence' of players. Now, the more 'in-game intelligence' a player has, the higher his ratings will be in the most important aspects of play. For example, the more 'in-game intelligence' a player has when dealing with the ball, the better he will be at giving accurate possession back and picking out the perfect pass. Or, the more 'in-game intelligence' a player has when challenging for a header, the easier it will be for you to win the battle. 'In-game intelligence' is applied to all aspects of gameplay, and there are changes to FIFA 22 that will make players' lives easier when playing on the pitch. Players will make more use of tactics to establish an advantageous position in a defensive situation or take an attack to a 2-on-1 situation. You can also attempt a dribble to escape the pressure, keep possession and establish a good position. There's a new switch-hit system. It will allow you to take a shot from an angle different to the one in which you originally took your last shot to either trick opponents or make it easier for you to beat them. If you play as a striker, for example, you can switch hit in the direction of the crossbar so that you have a different shooting angle to force opponents to move out of the position. And, if you choose to be a striker, the 'in-game intelligence' controls your ability to play off-the-ball, so you will make more use of the space and the footwork to beat opponents. "With FIFA in-game intelligence, we have raised the bar even higher for gameplay," says Sotiris Kyrgiakos, Executive Producer on FIFA 22. "A player's experience as he moves across the pitch is a direct reflection of his skills on the pitch. It adds great depth to gameplay, and you can use that to your advantage."
