Additional enhancements include: Keeper - The Keeper is a new type of player that has a different positioning in the defensive set up and uses a greater variety of moves. The Keeper features eight key defensive actions, while the

goalkeeper is now less likely to panic while a defender is injured. He also has better movement and timing on the ball while rushing off his line to make an interception. more open aerial duels by holding down the X button when receiving the ball. Ball Skills - The Ball Skills feature has been expanded to use ground reactions (jumping, sliding, and dragging), aerial duels, and crossing options.

For example, a new Shot Cross from the free-kick and a Cross from the back post can be used. And with new Aerial Crosses from very high and low crosses. Letters - New gameplay enhancements have been added to the Letters feature. Now you can score a goal by tapping the

top-right corner of the screen and slide the ball forward to hit the one-timer button. This will add an enormous boost to your team. You can also press the L1 button to place the ball in the centre of the crossbar to enable a drop-in target, just like in FIFA 21.

More enhancements are coming to the Letters feature in the future. Strikers – New attacking skills have been added to the new strikers, including the ability to lob the ball into the air for a powerful overhead kick. Players can now also score a rising shot

by tapping the top-right corner of the screen and

Also, if you want to move items around, simply drag the pack slider. I also have a map pack on this site, and a HUGE pack of 550 Items. The map pack is also the most recommended one to use, however it requires a certain amount of map knowledge to work well. Once you learn the map, it can be very, very

effective. If you are new to maps
