What is the VR Scale?

The VR Scale reflects our opinion of the strength of what the player can do. Performing high-impact actions increases the VR Scale, while performing actions that are hard to move, such as using magic, reduces the VR Scale.

7~12 is a good VR Scale. It is the highest VR scale of all the VR games released by today, and it symbolizes that we demand the high skill of the player.

The high strength of "Legend of Holy black hole" is due to the fact that one needs to use one's entire body to do long-distance movement. The feeling is too hard for the senses, such as the eyes.

What about the Cross-Play?

Basically, we want to bring "Legend of Holy black hole" to other platforms. Thus, we have been mindful of the differences in control methods, but we will proceed as soon as we make it possible for the player to clearly distinguish the moving directions.

However, we are planning to release this game on the PC as a VR game compatible for Oculus Rift. Cross-Play may be possible with this.

How can I purchase the game?

This game has been designed for Oculus Rift, so when you purchase the game, please
