"The player is a killer..a lone survivor who has a job." _ The player is a killer..a lone survivor who has a job.Before starting this story the player must ask his main question: Is he going to survive or not? The game starts with the player choosing his side.Is he going to become a wasteland baker or a hunter?Maybe he is a hired killer to become a cop and fight for police or government. The game follows a story and doesn't start with a white screen during character creation. However the player must choose a side and character archetype before starting the story. The archetypes are Endurance, Creativity, Hustle, Resourcefulness, Mindfulness, Intuition and Evil. Begin your journey to survival and discover how an unwillingly mutated human must survive in a post apocalyptic world. This game features a strong focus on Combat. Combat features a multitude of different ways to use the environment, your fellow teammates and your own abilities to fight. Game "Almost Alive" Combat System: "The player must manage his physical and mental abilities in real time." _ One of my goals was to integrate weapon abilities, combat, and character classes in the same game, then replay ability.The main theme is a fast paced real time combat focused on actions, skill management and reactions using cover and environmental features. The combat system offers a variety of different strategic moves and tactics: 1: The player can choose to fight or run in order to avoid enemy attacks. He can also use camouflage and even steal from him. The battle is very cinematic with reactions and reactions, the game features physics based animations for enemies/objects and a dynamic battle enviroment. 2: The player can use his environment like a shield or a weapon. Many times the environment is a much better weapon against AI than weapons. He must choose carefully the enemy location and the time he want to face him. 3: The player can use traps and skills against specific enemy types. This way the player can use advantages from his class or items to focus an enemy on something specific. 4: The player can use stealth to steal loot or an enemy from them or talk to them to convince and get information, loot or even earn his side. 5: The player can use items and skills to gain and keep an advantage or distract the enemy. AND THE PROPHYLACINE ANTAGONISTS IN THE TREATMENT OF SEXUAL AND OFFENSIVE ANIMALS {#Sec1}

===== Anthrozoos {#Sec2} -----
Animal sexual harassment is defined as repetitive unwanted sexual advances or sexual aggression which may involve males as well as females. The term can also be used as a general term to describe unwanted behavior that involves an animal. Behavior that constitutes sexual harassment is quite blatant, most of the time involving a rejection of contact and the use of force to maintain distance \[[@CR1],[@CR2]\]. Animal sexual harassment can be caused by the animal's owner; the owner's companion(s); another animal; or by other animals which may be the victim of aggression or sexual advances. The Golden Shovelhare (*Sylvilagus palustris*) is the animal most likely to be the target of sexual harassment. The Golden Shovelhare are a small rodent which ranges throughout North America and parts of Asia. Like the related Shrew mice, the adult male Golden Shovelhare grows a rough bristle coat or tuff which is light yellow and brownish, and is triangular in shape. The coat produces a tinny rattling noise which allows for species identification. Their teeth are special with a 2 mm mandible horn and a 3--6 mm incisor armed with an incisal point \[[@CR3]\]. In addition, the digital pads on the inside of their thumbs and toes are the largest of any rodent. Other male rodents, including the Chinchilla Rat (*Chinchilla lanigera*) and Hairy Woodrat (*Neotoma fusca*) have a vestigial moustachial fold but lack the triangle shaped bristle coat and mucous gland. Another animal that is predisposed to being harassed is the Tilapia or Tetra fish (*Tilapia sp*). Silver and black in color with a thin bluish rim on their dorsal fin, the Tilapia are small native freshwater fish that are easy to keep in the aquarium. They are the source of many of the freshwater fish for aquarium keeping throughout the world. They are omnivorous and feed on other small invertebrates, vegetables, organic matter, microorganisms, and also eggs and young fish from invertebrates \[[@CR4]\]. While the fish are non-social, the fish may gather into
