Unlike Microsoft Word, which may offer you one version of a document format that you can use to send to a customer or client, Photoshop has many different layer-based file types that make it easy to create and alter an image. You can save your image in one file format or another, depending on the file size of your final image and the speed and stability of your Internet connection. This book uses the most commonly used file formats, but to edit this book's illustrations, you'll need to use Adobe Illustrator. This program can save many different file formats and offers some of the same features as Photoshop. I use Photoshop for professional work, but I can do some of my editing with the less-expensive (and less-powerful) Photoshop Elements, which enables you to use Photoshop's layer system while removing the need for Photoshop's step-by-step menus. The utility that came with Photoshop was discontinued with version CS6 and is included on Photoshop Elements. With Photoshop Elements, you can still use some features of the tool, including access to the Camera Raw window, which is similar to the Window | Develop dialog box. You can access that window with the following steps: 1. From the menu bar, choose Photoshop | Adjustments | Levels. The Levels dialog box appears. 2. Click the Tab Levels button on the panel along the right edge to open a submenu. 3. Select the eyedropper tool from the list, and then click to select a color in the image. Use the eyedropper to select a color. 4. Click to set the foreground color on the histogram. The image darkens when you click to change the foreground color. 5. Click to adjust the Levels to darken the image. You can also adjust the other sliders in the Levels dialog box to change the tones in an image. You can use the Create a Levels Adjustment Layer button at the bottom of the dialog box to create a Levels Adjustment Layer, which has a Levels adjustment that you can use to apply Levels adjustments to a layer. You can also save a Levels Adjustment Layer in a file, so you can always apply that adjustment in the future. You can use Photoshop's History feature to return to previous versions of an image. To access History, choose Edit | Undo or press Ctrl+Z or Alt+Backspace. A screen appears showing the last n number of edits

Q: Is it possible to replace the border of a RecyclerView to become transparent? I'm working on an app using Flutter, and I want to make the border of the RecyclerView to be transparent. I've tried using BoxDecoration and BorderDecoration with a color tint: // Container that holds the children. BoxDecoration child = BoxDecoration(color: Color(0xff938056), border: Border.all(color: Colors.transparent), boxShadow: [BoxShadow(blurRadius: 4, color: Colors.grey),]); // This changes the Text's color. child.padding = EdgeInsets.all(10); return new Container(padding: EdgeInsets.all(5), child: new Material(elevation: 8, borderRadius: BorderRadius.circular(16), child: new ListView(padding: EdgeInsets.symmetric(horizontal: 10), children: [new Column(children: [new Text("Home", style: Theme.of(context).textTheme.headline,),],), new Text("Solutions",
