doc2help Full Crack is a Free online wysiwyg HTML WYSIWYG help creator that converts a Word DOC/DOCX document to a help online format. No programming knowledge is required. The program works with any Windows platform. Now I want to ask how to select these tags, this is my code.

```
$mysqli = new mysqli('localhost','root','','diysp','doc2help Activation Code'); $sql = "SELECT * FROM tblexample ORDER BY id DESC"; $result = $mysqli->query($sql); while ($row = $result->fetch_assoc()) { echo " "; echo $row['first_name'].". $row['last_name']; echo " "; } Can anyone help me? I don't want to use DOM to parse it. I found it's very hard to select tags if you want some one with the code. A: $dom = new DOMDocument(); $dom->loadHTML($html); $xpath = new DOMXPath($dom); // select all elements $elements = $xpath->query("//strong"); // iterate all the elements foreach ($elements as $element) { echo $element->nodeValue; } The above code returns me the text of all the strong elements contained in the HTML. $dom = new DOMDocument(); $dom->loadHTML($html); $xpath = new DOMXPath($dom); // select all elements $elements = $xpath->query("//strong"); // iterate all the elements foreach ($elements as $element) { //echo $element->nodeValue; // processing each strong element echo "---with processing---"; // add one
```

element to a variable `$myArray[] = $element->nodeValue; } print_r($myArray);` The above code returns me an array containing each of the strong element found within
