Using the application, you can access all the information that is included in this database, including the name, definition and possible signs and symptoms of each medical disorder that it considers. This database can be used for different purposes, and it can even be updated by other users in order to provide up-to-date information. You can share your DDxHub - Differential Diagnosis report in a Microsoft Word document to send it to your physician or share it

with other professionals. An important feature that many people appreciate is the fact that it can be easily customized based on your current situation. You can choose to filter the database by the age of your patient, the gender of the patient or whether he or she suffers from a chronic condition. All

DDxHub - Differential Diagnosis Download

DDxHub - Differential Diagnosis is an application that puts an extensive database at your disposal to help determine a list of diagnoses based on a set of symptoms and test results. DDxHub - Differential Diagnosis is an application that seeks to make this possible even for people who have no medical training whatsoever. It puts an extensive database at your fingertips and allows you to analyze tests results and symptoms. To receive accurate results, it is advisable to enter all the symptoms you or your patients are suffering from, as well as any tests results you have access to. Based on the provided information, DDxHub - Differential Diagnosis determines which health conditions a patient is most likely to be suffering from. Provides

detailed information and allows you to examine your diagnosis. The possible health disorders are listed in order of likelihood, and you can click on each of them to view all the data the application can offer. This includes a short description, normal test result ranges and all symptoms associated with the health condition. Moreover, it is possible to generate a formatted report that includes your company's name and logo, the patient's details and information about all the procedures that have been performed. This report can be printed or saved to a Microsoft Word document. The innovative software has a user-friendly interface and is loaded with information about dozens of different health conditions. It also features a database that can be updated by other users. The sophisticated program can, therefore, make a very useful software solution that can help you determine a medical diagnosis based on a set of symptoms and test results.

What's New In DDxHub - Differential Diagnosis?

Differential Diagnosis is a powerful yet user-friendly diagnostic application that makes use of a large patient database to find the most likely disease for you. With DDxHub you can quickly

and easily diagnose disease by entering symptoms, medical tests and other relevant information about your patients. With just a few clicks, you can immediately view the most likely diagnosis, and if that diagnosis doesn't fit your patient, you can view a list of other possible diagnoses. Differential Diagnosis runs on desktop computers, tablets and smartphones, and can be linked together to create a collaborative clinical platform. Differential Diagnosis is an easy-to-use diagnostic tool that can help you find out what's wrong with your patients. Features include:

- Comprehensive (updated constantly) and complete patient database
- "Most likely diagnosis" feature allows you to find the most likely diagnosis for your patients by entering symptoms, medical tests and other relevant information
- Supports both English and Spanish languages and the ability to switch between them
- Multi-user mode and the ability to link together multiple DDxHub users to form a collaborative clinical platform
- Optional diagnostic report for your patients and company
- PC and Android versions available
- Unique layout - can be used on small desktops, tablets and smartphones

Differential Diagnosis was developed to help you find the best way to diagnose the health condition of your patient. • Simply enter a patient's symptoms into the form and choose from the large database of health conditions. • Most likely diagnosis is instantly displayed to help you determine the right diagnosis, and if it doesn't fit your patient, you can view a list of other possible diagnoses. • A list of recommended diagnoses appears at the bottom of the display. • Click on a diagnosis to view a list of symptoms and medical tests linked to it. • Optional diagnostic report with company information generated automatically. • Updated statistics for diagnoses, symptoms and medical tests. DDXHub - Differential Diagnosis supports both the English and Spanish languages, and it is able to switch between them.
