Fifa 22 Features Key:

- Tactical Defending: Low ball tackling has never been easier thanks to improved AI logic which allows the game to dictate when and where the player tackles, forcing the defender to react. It's certainly not a situation where the ball is bouncing and running away, so defenders won't give up without a fight, or in a ton of pain.
- Football Superstars: The game introduces Football Superstars - real-life football greats who can take control of football action and form game-altering partnerships with up-and-coming stars like Neymar. They'll have a huge impact on the game with their unique attributes that allow you to create play that can completely change the outcome of the match.
- FIFA Trax: Experience the rush of an authentic goal-scoring sequence with 'FIFA Trax' modes. Seamlessly combine skilled chip shots and finish-line sprints to score the most exciting goals in every match.
- FIFA Training: Put your skills to the test in full-scale, in-engine training modes. No more running across open spaces to bring up your passing stats, just dart the ball to your teammates and see how they let them know you've served up a treat.
- Unlock All Moves and Skill Tricks: Play and unlock every skill and move in the game by earning the "My Goals" badges. Now all you need to do is win the matches!
- Collision Damage in Fifa Ultimate Team: During Ultimate Team battles, your player will take damage from the impact of a well-timed tackle. Hold your breath when you trap that ball in the penalty box and see if you make a foul.
- Pick-a-Nickname: Your player will pick their own custom nickname. You can choose to name them after yourself, their favourite players or the fandom, all while you can focus on the football and not the appearance.
- Tighter Ball Physics: Hold on to the ball and you won't lose control of your player. Get your second touch and you can drive the ball at your opponent with nowhere to run. Feeling bold? Now you can score that unstoppable chip on the goal-line!
- New UI for Skill Training: Now you can train your individual attributes in a much more accurate and effective way as you can actually see the impact of the moves on your stats screen.

Q: Access specific file index from disk cache of array I would like to ask whether it is possible to access certain file index from disk cache of an array? The reason why I ask this is because sometimes I make a call to the disk cache to speed up loading of a page and then I do it again for another page. This way I would expect to get a speed up of 2x but I get a speed up of only around 10x. I don't know where the two requests are coming from, so it must be that they come from cache and not from the disk... Below I have created a small test to demonstrate my problem:

```
library(shiny) library(leaflet) j %>% addTiles() %>% addPolygons(weight = 1, smoothFactor = 0.1, fillOpacity = 1, popup = paste
```
