In this post, I will explain the different tools in Photoshop and Elements and what steps you need to take when creating images in Photoshop. 1. Open First, we need to open an image we want to edit. The easiest way to do this is to just copy the image to your computer. After that we can open the image in Photoshop Elements. 2. Import When you open the image you want to edit, you will see a gray window. You can drag and drop the image into this window to import it. As the image is imported, Photoshop Elements automatically opens a new window for you to edit the image in. You can preview the image at any time by selecting View>Preview. 3. Select tools Next we need to choose the tools you want to use to edit the image. The tools are: 4. Adjust The Adjust toolbar is used to make changes to the image. Each tool changes a different part of the image. The entire image can be seen in the Adjust dialog. You will see the image divided into three main sections - Highlights, Shadow, and midtones. Highlights is the top of the image. Shadows is the bottom. The middle is midtones. The settings for each section are explained below. Highlights Shadow 5. Layer Layer is used to layer multiple parts of the image, allowing you to create special effects and move and rotate parts of the image. Layers can be moved individually or on an entire image. Each layer is always at a different location in the canvas. Layers can be assigned different effects. Layer modes are used to see your image at different sizes. 6. Eraser The Eraser tool is used to erase parts of the image. Erasing is done by choosing Select>Eraser. You can make simple shapes with the Eraser or create complex shapes that move and are rotated. You can also erase part of an object and leave other parts of the object. 7. Brush The Brush tool is used to make small brush strokes and fill the entire image with a brush stroke. You can select different brush sizes and shape. Brush size and shape

can be changed by using the Size and Shape options in the Brush Settings dialog. Brush in the middle of the image. 8. Map

Q: How do I make eclipse find the right jre? This post is about the java runtime. I've installed Eclipse Juno and JDK 1.7, the installer found both java versions and set them to be used when I open the program. When I run the program, it doesn't seem to use the one set as default by the installer. It uses the jvm bundled with eclipse instead of the one eclipse downloaded from the jdks website. When I run from eclipse it works fine, but the results come to a browser as html How do I set the default java version for Eclipse so it works like this? A: If you don't have those entries in the JRE to point to the correct JRE, Eclipse will use the ones defined in the OS (the 2 JRE's are different). Members of the Los Angeles Police Department who used excessive force during the 2015 raid on warehouse known as the “Ghost Ship” — a historic art and performance space in the city’s arts district — will see their use-of-force records expunged following a city Ethics Commission ruling. The city voted unanimously in September to expunge the records of all six officers involved in the raid, in which scores of partygoers ended up trapped in the building and at least two died. The commission ruled in April that LAPD Chief Charlie Beck’s discipline of the officers was improper. LAPD Deputy Chief Michel Moore told The Times he was disappointed the commission did not order all six officers’ records be expunged. But, in the end, the decision that the records be expunged was not his to make. “We appealed that decision,” Moore said. “This was the penalty of the decision that was rendered.” The commission did not tell the LAPD how to proceed with the record expungement.
