Description:. Is there any work around for this problem please guys.Q: Is it possible to build Q code (using ant) using nonstandard compilers and configurations? I want to build Qt code (using the ant build tool) by using nonstandard configurations and compilers. I am aware of using a specific configuration (/QMAKE..) but I want to be able to use a different compiler than g++. Any idea how this could be achieved? A: According to this mailing list article it is not possible and the main issue is support for non standard GCC from the compiler part. With great sadness I have to agree with Rainer. Q: Como posso verificar se um objecto foi adicionado ou removido durante a execucao de uma classe? Preciso verificar se algum item foi adicionado/removido em uma lista dentro de uma classe, ou seja, do objeto principal, e quando houver modificacao necessaria adiciono/removo ao lista. Uma das classes e o modelo: public class HomeModel { private List items; public List getItems() { return items; } public void setItems(List items) { this.items = items; } } Ou seja, tres classe que estao relacionadas e que adicionam/removem ou mudam a lista, por exemplo, no metodo addMethod(): public void addMethod() { HomeModel
