Improved Error Frame Vanilla Addon

April 13, 2015 - Does anyone know of an addon that removes error popups? on the screen? I'm not talking about the improved error frame (IEF). I'm talking about pop-ups in the Settings/System menu. If you click this button, you will see that it says "launch popup". This means that this is an error popup. And

it's not so bad, but not for me. Because I hate error popups. I hate them when I press that button. I hate them when I go into system settings. I hate and hate them. I hate them. I hate them. I hate them. And I hate them. And I hate them. And I hate them. dd2bc28256
