modern laptop, tablet or smartphone can be used as a camera. the iphone is a camera, as are the android devices. most modern

camera phones have an internal memory that they can use to store their images. a few also have an sd card slot, which is where they will store their images and videos. many

cameras can be connected to a computer via a usb cable, and this is where they will be stored. now, if you want to recover deleted images from your iphone, you can

do this easily with the help of camera ballistics. you simply select the images that you want to recover. then you press the recover button, and the selected images will

be recovered. the program offers a comprehensive collection of tools to help you extract personal data, including: photos, videos, call history, contacts, text

messages, multimedia messages, data from apps like skype, dropbox, evernote, facebook, whatsapp, viber, signal, wechat and lots of others. (adsbygoogle=window
