Most of the cast from the previous parts returned to the film, for example, Michael J. Fox, Geena Davis and Hugh Laurie will play their roles of Stewart again ... This is exactly the case when in the film there is humor, and history, and an interesting plot. The plot of the film is simple, as in the previous two parts, but this time I was very disappointed with the ending. It all starts with a story that happened to a professor and his three students in England. The guys are creating a new medicine, but is this work so harmless?... The whole movie is filled with interesting and original special effects, so it is very exciting and enjoyable to watch.
